

## ACPCybersecurityPolicyStatement

Approved by the Board of Regents on February 11, 2025

1. ACP recommends that the health care sector prioritize the cybersecurity and cyber resilience of health information technology (IT) systems.
2. ACP reaffirms that developers and vendors of all health IT systems should ensure that their products and systems are secure by design and recommends that these offerings be secure by default.
3. ACP recommends that HHS/CMS state Medicaid agencies and private payers ensure timely payment remedies for physicians impacted by large-scale cybersecurity incidents.
